Dante Domain Manager

Technical Note

REVISION: **1.0.0**
DATE: **SEPTEMBER 18, 2018**

Revision Log

Date	Version	Notes
Sept 18, 2018	1.0	First Release: Applies to Firmware Version **1.02.0000**

1.0 Domain Clocking

- When used with Dante Domain Manager, the NetPA 502 AT does not provide a domain clock. This is separate from the audio master clock parameters, displayed and user-selected in Dante Controller. When a NetPA 502 AT is used with Dante Domain Manager, another Dante device, capable of providing a domain clock, must be present in the same domain as the NetPA 502 AT.
